

# Hannah's House: Leep House Project Ideas

**AIM:** Apply for LCMS Life Grant. Key: We need to supply some volunteer power, as well as ask for money for larger items. We need to form a team and decide which items we have the skills and interest to support.

**APPEAL TO YOU:** Please email PC at [adamclarknd@gmail.com](mailto:adamclarknd@gmail.com) if you would join a team to decide on and do the project; indicate which items YOU could get most excited about and help with – late summer to fall.

## Backyard

Overall: Create a nice space that the moms want to be in. Right now, no one uses the backyard because it looks scraggly and decrepit, the iron picnic table is warped and has only one chair, and the patio is weird, broken, and unusable for meals for all.

1) **Landscaping Reno** – clear old bushes; plant small shrubs and trees with purpose

2) **Eating Area Reno** - Preferred: replace patio/pavers outside backdoor with a unified deck or patio with new table and chairs; seed grass where the table currently is in the yard.

OR, if that not do-able, at least create level ground where the table currently is and replace it.

3) **Replace Polyvinyl Fence** – the Tree on the property line is “bulging” through one section of fencing, which also has made some other sections unstable.

- See if neighbors would let us take tree down. If not, move fence line inward to accommodate.
- NOTE: HH is trying to move beyond piecemeal sections not quite matching in color or on different “schedules” of lifetime until replacement. So they would rather us replace the whole thing, or not do this particular element.

## **Porch and/or Sidewalk between Front and Back**

**Sand and repaint** – had been painted, blast off and redo
